TRAK 2^{OP}

B-C-D Metal Products

B-C-D Metal Products

- Third-generation family-owned shop
- Specializes in tube bending
- Needed to conduct secondary operations due to higher volume of jobs

Better Labor Utilization

- Emphasis on Lean Manufacturing
- Increasing volume of CNC work
- Need for increased efficiency
- Maximize output
- Minimize capital costs

B-C-D's 2^{OP}

- Spreads machinists' time over multiple spindles
- Reduces labor required per part, thus reducing part's cost
- Cut down on non-cutting time, reducing lot sizes

Benefits of the 2^{OP}

- Easy to use, even for lower skilled machinists
- Familiar to existing TRAK users
- Easily move to any idle operator
